

# ESD Conductive Plastic Sheet

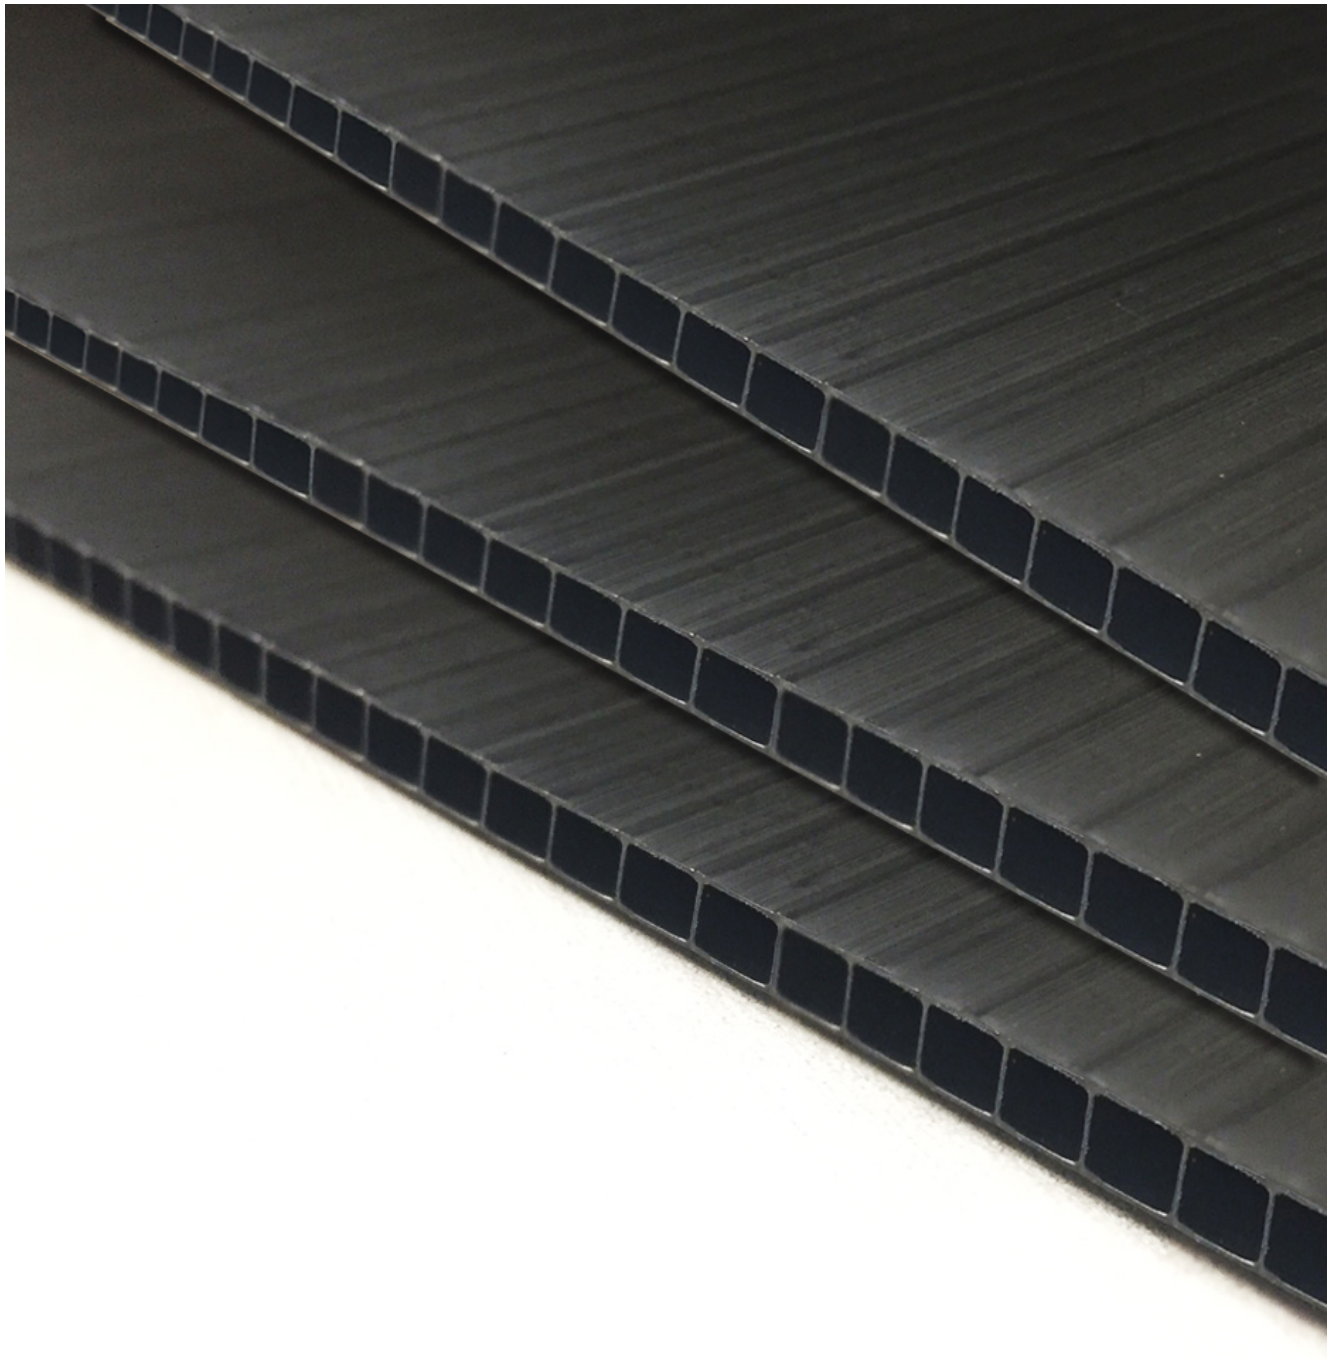

Electronic parts require handling highly sensitive components. For that reason, manufacturers need to move and package inside an ecosystem free from contamination and static free. Sadly, technology of traditional packaging has not been enough to keep the high demand on transportation and electronic industry packaging.

The products manufactured by LAMINEX can achieve these resistivity:

## Lamicorr ESD | Polypropylene Corrugated Conductive Sheet

Laminex offers corrugated plastic sheet which is a light product with highly structural performance. Within the portfolio of options we included ESD sheets (Electrostatic Discharge). The ESD Lamicorr Sheet is used specifically for packaging and transportation of electronic components and devices that require protection against any electrostatic damage (ESD).
